Professional Summary

AWS Certified DevOps Engineer with hands-on experience in cloud automation, CI/CD pipelines, Infrastructure as Code, and Kubernetes. Proficient in deploying and managing scalable microservices on AWS EKS and Kubernetes Service using GitOps and monitoring tools. Seeking a DevOps role to automate infrastructure, streamline deployments, and improve system reliability.

EXPERIENCE

DevOps Engineer Intern — PearlThoughts

DEC 2025 – Jan 2026 | Remote

- Built and deployed AWS infrastructure using Terraform (IaC).
- Configured EC2, Security Groups, IAM, and networking.
- Automated server provisioning using Bash scripts.
- Worked with CI/CD pipelines and cloud best practices.

PROJECTS

Project Name - Three-tier Application Deployment on AWS EKS :

- Architected enterprise-grade cloud infrastructure deploying a complete three-tier application (ReactJS, NodeJS, MongoDB) on Amazon EKS with 99.9% uptime using AWS Load Balancer Controller and auto-scaling
- Accelerated delivery through automation by implementing Terraform IaC (reducing provisioning from 4 hours to 15 minutes) and Jenkins CI/CD pipeline with ArgoCD GitOps, cutting deployment time by 70% and manual intervention by 80%
- Established production-ready observability with comprehensive Prometheus and Grafana monitoring stack featuring custom dashboards for real-time metrics, logs, and performance tracking
- Delivered measurable business value achieving 40% cost optimization through efficient resource management, automated cleanup processes, and strategic infrastructure design.

Project Name - Wanderlust — full-stack blogging platform :

- Engineered a production-ready blogging platform (React, Node.js, Express, TypeScript) on Vercel with JWT/session authentication, Redis server-side caching, and RESTful API design supporting full CRUD operations with 99.9% availability
- Accelerated development workflow by containerizing all services with Docker and docker-compose, reducing environment setup time and eliminating configuration drift across dev and production environments
- Established CI/CD-ready delivery pipeline with a Jenkinsfile-driven automation strategy and Jest unit/integration test suite, cutting manual deployment steps by 80% and improving release confidence
- Delivered measurable performance gains through Redis caching layer and Tailwind CSS-optimized frontend, improving API response times and achieving a maintainable, scalable codebase ready for production load

Technical Expertise

- **Cloud & Infrastructure:** AWS | Terraform, Ansible | IAM & Security
- **Container Orchestration:** Docker, Kubernetes, Amazon EKS | Auto-scaling
- **CI/CD & :** Jenkins, Git
- **Monitoring & Observability:** Prometheus, Grafana, EFK Stack, Jaeger, CloudWatch | Alerting & Log Analysis
- **Scripting & Programming:** Python, Shell/Bash, SQL/NoSQL | Automation Framework Development, OOPS
- **Networking:** TCP/IP, DNS, Load Balancing | netstat, ping, traceroute, nc, tcpdump, SSH/SCP
- **Operating Systems:** Linux Administration

Certification

- **AWS Certified Solutions Architect – Associate**

Credential URL - www.credly.com/badges/8336f37b-d694-499c-812c-06e86db040c7

Validity - July 21, 2025 - July 21, 2028

Education

Aalim muhammed salegh college of engineering
B.E. Computer Science Engineering | 2021 – 2025

Folio No: AUE11065698
